The FSC is charged with supervision of the Management company with regard to this Key Information Document ("KID").

Date of last amendment of KID: 16.05.2024.

What is this product?

Type: Exchange-traded fund EF PRINCIPAL ETF is an open-ended collective investment scheme for investing in securities and other liquid financial assets, of funds raised through a public offering of shares, which is carried out on the principle of risk allocation. EF Principal ETF is an actively managed exchange traded fund, managed in accordance with the objectives and policies of the collective investment scheme, the management of which does not monitor a specific indicator. The Fund constantly issues (sells) and redeems its shares, except in the cases of temporary suspension of sale/redemption provided by the law.

Term: The fund is established for an unlimited period. The MC has the right to adopt a resolution to terminate the Fund in accordance with Bulgarian legislation. The Fund can be automatically terminated if its license is revoked by the FSC.

Depository: UniCredit Bulbank AD.

Country in which the product is offered: Bulgaria and Germany.

Goals: The main objectives of the fund are an increase in the value of the investments of the holders of shares through realisation of the maximum possible income while assuming a moderate to a high risk and ensuring the liquidity of the investments of the holders of shares. The Fund invests predominantly in shares traded on a regulated market in Bulgaria. The Fund will also invest in debt securities and fixed income instruments, primarily with a view to maintaining the liquidity even at times of market upheavals. The investment strategy of the Fund provides for the realisation of capital profits from securities, income from dividends/share securities, as well as for current income from debt securities and other financial instruments. For achieving the investment objectives, a strategy of active management of the portfolio of securities, financial assets and monetary resources is implemented. In order to achieve its main investment objectives, the Fund applies appropriate strategies for protection against market risk, currency risk and other risks ('hedging'): transactions involving options, futures contracts, swaps and other derivatives. The Fund may invest in debt securities issued by companies, governments and other entities and there is no minimum credit rating requirement for them.

Main factors on which the Fund's profitability depends: its investment strategy and risk profile, the investors' investment horizon, their costs related to the acquisition of shares, etc. Given the risk profile of the Fund, its investment policy and its expected returns, it is not suitable for investors who wish to withdraw their investment before the 5th year.

The Fund is actively managed and has no predetermined benchmark against which it may be compared, and does not pursue a specific objective in relation to any particular industry, geographic or other market sector, or particular asset classes.

Intended for retail investors Investment in the Fund's shares is suitable for Bulgarian and foreign individuals, companies and institutions who are willing to invest a part of their resources on the financial markets in a diversified product consisting mainly of shares, at a high level of risk and a possibility of achieving higher return. The fund is designed for investors with basic knowledge and experience with financial products who know that they may lose part or all of their investment. The time horizon of the investment is 5 years.

Additional information about the Fund, as well as a free copy of the prospectus, of the last annual and all subsequent six-monthly reports in Bulgarian, can be obtained at the office of the Management Company in Sofia 1592, Iskar district, 43 Christopher Columbus Blvd., every working day from 09.00 to 17.00 h at: 02/9021944, e-mail: office@efam.bg; as well as on the Company's website: www.efam.bg.

The issue value and the redemption price of the Fund's shares are disclosed on the website of the Management Company: www.efam.bg, on the website of the Bulgarian Association of Asset Management Companies: www.baud.bg, as well as in the offices provided by the Management Company.

What are the risks and what is the reward I could get?

Summary risk indicator (SRI)

The risk indicator is based on the assumption that you will hold the product for 5 years. The actual risk could vary significantly if you cash in early, the return could also be smaller.

The SRI provides information about the risk level of this product compared to other products. It shows the probability of monetary loss for this product as a result of the market dynamic or because we would be unable to pay out.

We gave this product a risk category of "3" out of 7. (1= "lowest risk", 2= "low risk", 3= "medium low risk", 4= "medium risk", 5= "medium high risk", 6 = "second most important risk", 7= "highest risk" medium low risk. SRI aims to provide guidance on the Fund's risk level and its potential for income. The higher the number, the higher the potential for growth, but also the risk of losing money. The lowest category is not a risk-free investment.

This product does not have any protection from the market dynamics, therefore you could lose your entire investment or a part of it.

If we are unable to pay out your due you could lose your entire investment.

Significant risks which could not be adequately covered by SRI: liquidity, credit, risk of investments in derivative financial instruments, tax, regulatory, political, operational, inflation, currency.

Performance scenarios

The values shown include all costs associated with the product itself, but may not include all costs for your consultant or the person offering the product to you.

These values do not take into account your tax status, which may affect your return.

The return on this product depends on future market performance. Future market dynamics are uncertain and cannot be accurately predicted.

The presented scenarios – pessimistic, moderate and optimistic – illustrate the most unfavorable, average and most favorable results for the Fund over the last 10 years. Future market dynamics may be very different from those observed.

Recommended holding period:		5 years	
Example investment:		BGN 10,000	
		If you withdraw your investment after 1 year	If you withdraw your investment after 5 years
Scenarios			
Minimum return	You could lose all or part of your invested funds.		
Crisis scenario			
	What would you get after deducting expenses	BGN 4,763	BGN 8,707
	Average annual return	-52.37%	-12.93%
Pessimistic scenario			
	What would you get after deducting expenses	BGN 9,502	BGN 9,781
	Average annual return	-4.98%	-2.19%
Moderate scenario			
	What would you get after deducting expenses	BGN 9,958	BGN 10,012
	Average annual return	-0.42%	0.12%
Optimistic scenario			
	What would you get after deducting expenses	BGN 10,945	BGN 10,239
	Average annual return	9.45%	2.39%

The scenarios for the results for the recommended holding period - 5 years occur for the following periods: pessimistic - 30.04.2015 - 30.04.2020; moderate - 30.09.2016 - 30.09.2021; optimistic - 31.01.2018 - 31.01.2023

What happens if the Management Company is unable to pay what is owed?

Investments in the Fund are not guaranteed by a guarantee fund created by the state or by any other type of guarantee and there is a risk that you will not recover your investment in full. The Management Company keeps the Fund's assets in a depositary bank. The Fund's assets are separate from the Management Company's assets as well as the depositary bank's assets. The depositary bank is not liable for its debts to its creditors with the Fund's assets. In case of bankruptcy or an equivalent procedure of the depositary bank and/or of a third party to whom functions have been delegated, as well as in cases of placing the depositary bank under special supervision, the assets of the Fund cannot be distributed among or redeemed in favor of the creditors of the depositary bank and/or the third party, and are transferred to a new depositary.

What are the expenses?

The tables state the amounts taken from your investment to cover various expenses. These funds depend on how much you invest and how long you hold the product. The amounts stated are indicative and have been calculated based on an indicative investment amount and different possible holding periods.

Our assumptions are as follows:

- the first year you will get back the invested funds (0% annual return);
- for the remaining holding periods, we assume that the product results are as shown in the moderate scenario;
- BGN 10,000 were invested.

Expenses over time

	If you withdraw your investment after 1 year	If you withdraw your investment after a recommended holding period
Total expenses	BGN 188	BGN 889
Annual expense impact (*)	1.88 %	1.78 %

(*) This shows how expenses reduce your annual return over the holding period. For example, if you withdraw your investment at the end of the recommended holding period, the average annual return is expected to be 1.90% before expenses and 0.12% after.

Expense elements

One-time expenses - initial fee and withdrawal fee	If you [withdraw your investment] after [1 year/a recommended holding period]	
Initial fee	We do not charge an initial fee.	-
Fee when withdrawing the investment	We do not charge a withdrawal fee	-
Ongoing expenses		
Management fees and other administrative or operational expenses	1.60% of the value of your investment annually. This is an estimate based on actual spending for the past year.	BGN 160
Transaction expenses	0.27% of the value of your investment annually. This is an estimate of our expenses to buy and sell the underlying instrument of the product. The actual value will vary depending on how much we buy and sell.	BGN 27
Accompanying expenses in extraordinary circumstances		
Performance fee and deferred reward	This product does not have a performance fee.	-

How long should I keep my investment and can I cash out early?

Recommended holding period: 5 years

The recommended holding period is determined in view of the Fund's investment objectives and policy, as well as the characteristics of the typical investor. The Management Company redeems the Fund's shares every business day, under the conditions and according to the procedure provided in the Fund's rules and prospectus, except when redemption is suspended.

The redemption of shares is carried out at a price equal to the net asset value per share. No special fees are due when redeeming before the recommended period.

How can I file a complaint?
